The Office of Higher Education (OHE) newsletter describes the current and upcoming activities related to higher education.

Certification Exam Safety Nets. The safety nets deadlines for the edTPA, Educating All Students (EAS) Exam, and content specialty tests (CSTs) have been extended over the past two years to June 30, 2018 or later, depending on the assessment. However, the requirement for candidates who use one or more safety nets to complete all additional certification requirements by June 30, 2018 has not changed. The [proposed regulation amendment](#) eliminates the requirement to complete all additional certification requirements by June 30, 2018 for candidates who use one or more safety nets. Candidates must continue to take advantage of [safety nets before their expiration date](#), but now they can complete any additional certification requirements at their own pace. In addition, the proposed regulation amendment extends the safety net deadline for Part Two (mathematics) of the Multi-Subject: Secondary Teachers (Grades 7-12) CST until such time that the revised mathematics portion of the exam becomes operational, which is expected to be in fall of 2018.
