PLEASE EXPLAIN HOW GROWTH TARGETS FOR EACH STUDENT ARE SET FOR THE STATE ASSESSMENT METHOD OF COLLECTING STUDENT LEVEL BASELINE DATA, INCLUDING HOW TARGETS ARE DIFFERENTIATED AS NECESSARY BASED ON THE INFORMATION PROVIDED BY THE BASELINE DATA. IN PARTICULAR, PLEASE EXPLAIN HOW ASSESSMENT IS DONE WITH STUDENTS WHOSE PREPAREDNESS FOR THE COURSE GRADE LEVEL IS VARYING.

Student Learning Objectives are established by administration at the beginning of each year. A score of 65 on the assessment is the minimum expectation to demonstrate sufficient growth for each SLO. This score was selected because students achieving this score historically have been at least minimally prepared to successfully complete the next course in the sequence.

state standards, as well as any other school and LEA goals included in the SLO. SLOs must be specific and measurable, based on available prior student learning data. Before setting targets for SLOs, reviewing relevant baseline data. This baseline data may come from a variety of sources, but are not limited to, pretests, or end of course assessments from the prior year. At the beginning of each school year, teachers engage students in review of previous learned material to assess. This will provide an opportunity to measure growth and check for understanding.

SLOs are developed and approved through locally determined processes consistent with the setting process. SLOs should be based on the best available student data and should be ambitious and rigorous for all students. Superintendents must certify that all individual growth targets used for SLOs represent, at a minimum, one year of expected growth.
