<p>packaged vertical unit ventilators in each classroom.</p> <p>Current Issues The Elementary classrooms are currently provided with ventilation air from two central Air Handling Units (AHU-2 and AHU-3). Both AHUs were originally installed in 1996 and have reached the end of their expected service life. Each AHU provides heated ventilation air only with no air-conditioning or humidity control.</p> <p>Other concerns include:</p> <ul style="list-style-type: none"><li>• AHU-3 location in basement boiler room resulting in corrosion of the AHU of its components.</li><li>• AHU-3 utilizes an in-ground area for outside air intake that has inadequate drainage and is also located</li></ul>
