Foreword

The information contained in this Educator Guide is designed to raise educator awareness of the [Generation Mathematics Learning Standards](https://www.nysed.gov/state-assessment/grades-3-8-test-schedules) ([jwru<ll y y0p{ugf0iqxlewtkewnwo/kpuvtwevkqplpgy/{qtm/state-next-generation-mathematics-learning-standards}](https://www.nysed.gov/state-assessment/grades-3-8-test-schedules)).

The guide provides educators with pertinent information about the test development process, the learning standards that the tests are designed to measure, the format of the testing sessions which includes what understanding of the structure of the mathematics tests. Educators are encouraged to review the guide prior to the test administration to gain familiarity with the test format. The information presented can also be used as a platform for educator discussion on how student assessment results can guide future instruction.

The Elementary and Intermediate testing schedule for the spring administration can be found on the Department's [website](https://www.nysed.gov/state-assessment/grades-3-8-test-schedules) (<https://www.nysed.gov/state-assessment/grades-3-8-test-schedules>). Questions can be directed to emscassessinfo@nysed.gov or emscurric@nysed.gov.

3-Credit Constructed-Response Holistic Rubric

3 Credits	

The following scoring policies must be applied while scoring the mathematics tests for all Grades 3–8. The rubrics for the constructed-response questions are designed to provide a systematic, consistent method for awarding credit. Each response must be rated carefully using the teacher’s professional judgment

1-Credit Constructed-Response Mathematics Scoring Policies

- 30" The student is **not** eligible for credit. The student's response is illegible or does not address the question.
- 40" If the student provides a response that is not a complete answer to the question, the student should still receive full credit.
3. If the student provides one legible response (and one response only), the rater should score the response, even if it has been crossed out.
- 60" If the student has written more than one response but has crossed some out, the rater should score only the response that has **not** been crossed out.
- 70" If the student provides more than one response but does not indicate which response is to be considered the correct response and none have been crossed out, the student shall not receive credit.
6. If the student does not provide the answer in the form as directed in the question, the student will not receive credit.
7. If the student provides an answer that is not in the form as directed in the question, the student will not receive credit.
8. If the student provides an answer that is not in the form as directed in the question, the student will not receive credit.
9. If the student provides an answer that is not in the form as directed in the question, the student will not receive credit.
